Morning Oregonian.

VOL. IX. PORTLAND, OREGON: FRIDAY MORNING, AUGUST 6, 1869. NO. 157.

The Daily Oregonian.

HENRY L. PITTOCK, Proprietor.

THE DAILY MORNING OREGONIAN is published every day, except Sunday, and delivered by carriers to subscribers in Portland at 37½ cents a week. Single copies, 12½ cents. By Mail or Express, to any part of the State at $10 per annum in advance; $6 for six months; $3 for three months. Advertising at liberal rates.

THE WEEKLY OREGONIAN, containing a selection of the best articles in the Daily, will be published every Saturday morning, and forwarded by Mail to any part of the State at $3 per annum, $2 for six months, and $1 for three months, in advance.

All papers discontinued at the end of the time for which they are paid. Subscribers should renew at least two weeks before the date printed upon the address label.

HOAGLAND'S
NEW PATENT SHAFT COUPLING!
W. E. COOPER
HAS PURCHASED THE RIGHT FOR THIS County of the above Patent, and will hereafter use it in the construction of all the Vehicles manufactured at his extensive
Carriage Factory,
Corner of Second and Morrison Streets.
He respectfully refers to the following
CARD.
Having examined the New Patent Shaft Coupling, invented by H. R. Hoagland, we feel pleasure in informing the public that in our opinion it is the safest and best method of connecting shafts or tongues to all vehicles that has ever been used.
It fastens without bolt or screw, and is therefore, easily and speedily separated. It rests on Gutta Percha so as to be entirely free from the rattling sound which so often disturbs restless horses. It is easily changed so that the shafts or tongue may be detached in an instant, and is convenient, safe and secure.
It is easy to change to this style of coupling any buggy or other vehicle now in use, and with small expense. We have come to the conclusion to use this new invention ourselves and recommend its use in all cases. We consider it far superior to the Brewster Patent, heretofore considered the best in use.

[DISPATCHES TO THE OREGONIAN.]

DATES TO AUGUST 4.

Washington News.

WASHINGTON, Aug. 4.—New developments are being made daily, concerning the spurious ten dollar greenbacks. Two specimens received today, bear witness that they are a new issue, for all the defects previously referred to have been removed. The general appearance of the notes exactly corresponds with the genuine so that those last defy detection by professional experts.

The Commissioner of the General Land Office has received a letter from the Surveyor of the boundary line between California and Oregon, announcing the establishment of the line as far as 191 miles. The work will probably be completed the present month.

The report of the Board of Visitors to the West Point Military Academy is received at the War Department. It states, among other things, that although the institution has effected much good, does not meet the requirements of the present day. It should therefore be raised to a standard unsurpassed abroad. They recommend the enlargement of the Academy and an increase of the number of pupils.

The Union War Prisoner Association held a regular meeting last night. The Committee having charge of the erection of a monument in this city to the memory of those who died in Southern prisons, reported that indications from all parts of the country are most cheering as indicating a most substantial response in aid of the project.

Alabama Election News.

MONTGOMERY, Aug. 4.—The election news is meagre; the vote is less than last year. The probabilities favor the election of Parkins, Democrat, in the Third District, by a handsome majority. The contest in the Second District is much closer than was expected. Fears are entertained that Buckley, Republican, is defeated on account of the great falling off of the negro vote.

MOBILE, Aug. 4.—Munn, Dem., is probably elected to Congress by 1,500 majority.

A negro mob took possession of the polls in Baldwin county, beat one white man, and prevented many Democratic negroes from voting.

MONTGOMERY, ALA., Aug. 4.—*Enough returns* have been received to indicate the election of Parkins, Democrat, by several hundred majority, in the Third District. Buckley, Radical, is elected to this District.

Exposition of Textile Fabrics.

CINCINNATI, Aug. 4.—The exposition of textile fabrics grows in magnitude and importance. Fully twenty thousand persons visited the room to-day. The total number of entries is 1,284. A box of Kessle's cassimers and jeans was received from Brigham Young to-day, from the Desert mills.

Tennessee Affairs.

MEMPHIS, Aug. 4.—There is much excitement about the election to-morrow. Extra precaution has been taken by the authorities to prevent disturbances at the polls, where, for the first time, white and black have to vote together. Separate polls have not been established.

NASHVILLE, Aug. 4.—The interest in the election to-morrow is unabated. The supporters of Stokes and Senter are both very active. Stokes has gained steadily during the past two weeks, but there is a serious reaction. The prospect is still favorable for Senter and a liberal Legislature.

CHICAGO, Aug. 5.—The *Republican's* special says Bailie Briton is a candidate for the United States Senate against Andrew Johnson. He preserved a good Union record throughout the war, and is very popular among the Unionists of Tennessee.

Terrible Fire at Philadelphia.

PHILADELPHIA, Aug. 4. 10 P. M.—Since 7 o'clock this evening, an immense fire has been raging in the U. S. bonded warehouse on Lombard street. The wharf building contains 80,000 barrels of whisky, which will be totally destroyed. The loss will reach $2,500,000. The fire was caused by the explosion of a boiler. It is thought the engineer and watchman have perished in the flames, which are spreading frightfully.

PHILADELPHIA, Aug. 4, Midnight.—The fire is still raging, with little prospect of subjugation till morning. The whole Fire Department is on the ground, but from the combustible nature of the contents, they are unable to do more than to prevent the spread of the flames.

Railroad Disaster.

BETHEL, Conn., Aug. 4.—Yesterday morning the trestle work at Fishkill, on the Providence Railroad, *about four miles east of Danburg*, gave way with a train of four dirt cars with seven men. One man was killed instantly and two others lived about half an hour. Another is not expected to live.

Miscellaneous.

BOSTON, Aug. 4.—The brig *Kate Hodin*, from St. Domingo, arrived below to-day. Nearly her whole crew are down with the yellow fever.

PHILADELPHIA, Aug. 4.—The show case of G. A. Nast's silver ware establishment, corner of Eighth and Chesnut streets, was broken open and a large amount of valuable jewelry abstracted.

The iron-clad *Dictator* sails this P. M. for New York for a thorough overhauling, preparatory to a cruise. Rumors point to the coast of Cuba as her destination.

Canada News.

TORONTO, Aug. 4.—Four buildings were destroyed by fire this morning. During the fire a chimney fell, seriously injuring four men.

The Royal Canadian Bank resumes on the 15th August.

The buck drivers are on a strike. Not a cab has been on the streets for two days. The new by-law regulating fare has caused the difficulty.

Cuban Affairs.

NEW YORK, Aug. 4.—The seizure of the Spanish gunboats still attracts attention. De Hamator had an interview with Marshal Barlow relative to the ultimate course to be pursued by the Government about the Spanish gunboats. It is understood the Marshal informed him he should rigidly obey the orders of the Government for the suppression of filibustering, whether by Cubans or Spaniards, and that the vessels will be held till a release is ordered by the authorities at Washington.

HAVANA, 4.—The Aug. Captain-General has authorized the Spanish Bank to issue a second loan. The proceeds of confiscated estates are specially pledged for its redemption. The number of volunteers in the islands is 30,000.

BY ATLANTIC CABLE.

ST. PETERSBURG, Aug. 3.—A letter states that the peasant who saved the life of the Czar did not commit suicide, but was murdered in his house. Several persons were arrested for complicity in this crime.

The town of Driffle was almost destroyed by fire July 18th. 700 tenements were burned. Eight thousand persons are homeless. The loss is over two million dollars.

LONDON, Aug. 3.—In the House of Commons to-day, the under Secretary of Foreign Affairs said agents of the *British Government are making* every effort to obtain access to the Englishmen now held captive in Paraguay. The last intelligence received in regard to them was furnished by two American navy officers. They were all well but are still restrained of liberty by command of Lopez.

Visbount Milton asked if the Government could inform the House what progress had been made in the San Juan Island boundary negotiations and what the expense of holding possession of that island had been. Otway replied that as differences still existed with the United States, it was a question the Government was unable to furnish any information upon or to lay any correspondence on the table. The General Government of 1860 had submitted to the House what information it thought fit. If Lord Milton was able to add anything to that the Government would be glad to hear from him. It was impossible, on such short notice, to say what the cost of occupation of the island amounted to.

The Harvard Crew were out again on the Thames to-day. They showed a better form and were visited by Shaw, coxswain of the Oxford boat.

A portion of the London Metropolitan Fire Brigade will visit New York.

Mrs. Vivian has gained her suit for divorce against the Marquis of Waterford with costs.

The Greek firm of Franghuldi & Rhodocanchi, the New York branch of which failed, has suspended payment here.

The Harvard crew made two practice trips on the Thames to-day. The weather was rainy and otherwise unfavorable, but the men exhibited a decided improvement in rowing. They don't dip so deep as before and take longer strokes.

PARIS, Aug. 3.—*At the opening of the session* of the Senate yesterday, Rouher made an address. He referred to the duty which devolved upon that body of advancing the proposed reforms. He said they should inquire whether they were popular enough to go hand in hand with liberty and at the same time strong enough for resistance. He was confident the Senate would enter upon the discussion with a firm intent of forwarding the wishes of the country and that by the combined efforts of the Government and the Senate, more genuine harmony will be established between the powers of State, and that the institutions of Empire would acquire new strength, lustre and popularity. In conclusion, he expressed his profound regret at the death of the late President of the French Senate.

Yesterday the *Senatus Consultum* was read in addition to provisions telegraphed to-night. It provides that Ministers are to defend only the Emperor and will continue to deliberate in Council under his Presidency. They are, however, to be considered responsible for their acts and can only be impeached by the Senate. A Minister, whether a member of the Senate or Corps Legislatif, has the right to be present at the sessions of either Chamber.

The Minister of Justice made some explanations to the Senate of a very liberal character. The Senate has *adjourned until Thursday*, when they will meet and appoint a committee of ten to consider the *Senatum consultum*.

NEW YORK, Aug. 4.—Long Branch private letters from Rome say there are indications that the Ecumenical Council will last twelve or twenty months. The Italian Government has bought up all the claims against Naples except of those who may hereafter live outside of that territory.

A London letter says a meeting was held in London consisting of the eminent representatives of the Pacific colonies, and presided over by one of the most eminent colonial Governors, Wyatt. Deep and general dissatisfaction is expressed with the political demoralization of their important growing countries with the parent State. Influential colonists have sent a report relative. In fact all the important interests are joined in expressing a determination to require some reconstruction of the British Colonial Empire, which should afford them a guarantee that the interests of the various colonies should receive prompt attention. In the event of this being found impracticable—and the sense of the meeting was decidedly that it would be so found—it was declared that they should use their influence with their respective constituents to leave British allegiance and seek, in some form, the protection of the United States, or at all events to become in some manner, as may be decided, members of that system of the great Republic. This meeting was not public, but its results are likely to be known at an early day.

SEVILLE, Aug. 4.—Official advices contradict the statement that two Carlist prisoners were shot by order of a council of war. Several bands of Carlists, in different parts of the country, have scattered in the past few days.

LISBON, Aug. 4.—The Chambers have adopted resolutions authorizing the Government to grant concessions to companies desiring to lay cables to and from Portugal.

LIVERPOOL, Aug. 3.—Capt. Kendrick and the crew of the bark *Ontario*, from New York for Melbourne, abandoned at sea May 30th, have been saved and landed at Mauritius.

DRESDEN, Aug. 3.—The accounts of the explosion in the mines have not been exaggerated. Three hundred and twenty-one dead are counted. The scenes in the neighborhood of the mines are heart-rending.

MADRID, Aug. 3.—There have been several encounters between the Government troops and the Carlists. The insurgents in all the latter were beaten. A number of the insurgents were killed and wounded and many taken prisoners. The volunteers are behaving with great violence. The civil and judicial authorities are powerless to check them. The journalists of Madrid have held a meeting to protest against the acts of the volunteers.

MADRID, Aug. 4.—It is asserted that Government will shortly call out the reserves to repulse a formidable uprising of the Carlists, which has occurred in Tonesota.

BERLIN, Aug. 3.—The *Borsen Zeitung*, discussing the possibility of an imposition by Congress of a tax on coupons of the U. S. bonds, expresses confidence that the Republicans will remain faithful to the programme, in which they pronounced energetically against repudiation. The *Zeitung* declares that the current rumors to the effect that such a tax is contemplated are mere maneuvers of the Stock Exchange.

CONSTANTINOPLE, Aug. 4.—An aid-de camp of the Grand Vizer is about to leave Egypt, bearing a letter to the Viceroy, which, after recounting the grievances of the Sublime Porte, concludes with an intimation that in case no satisfactory explanations are given, the Porte will withdraw the privileges accorded by the firman of 1841.

OUR SAN FRANCISCO DISPATCH.

SAN FRANCISCO, Aug. 4.—The Board of Directors of the Industrial School held a meeting last night. Their report of the recent investigation was read. The majority report commends Morrill as a humane man, but deems him unfitted for the position he occupies. Also that two or three others ought to be relieved. Kennedy's report advises the removal of everybody connected with the institution. O'Neil's report is temperate and well digested, and defends Morrill. This report was adopted by the Board, much to the disgust of the Investigating Committee.

The Republican County Committee met last night and decided to appoint a Legislative and a Municipal Convention. A committee of three was appointed on resolutions, and the meeting adjourned to Thursday night, when delegates to both Conventions will be named.

The Democratic Judicial and Legislative Convention met last evening. R. R. Provines was nominated for Judge of the 12th District Court, and R. F. Morrison for Judge of the 4th District Court. A sharp contest then ensued between Higgins and Johnson for the recordership, and terminated by Johnson's friends having the meeting adjourned till to-night.

Police officer Trieste has been suspended from duty for drunkenness, while on special duty, at Hayes' Park.

The steamer *Oregonian* sailed for Yokohama and Hong Kong, at noon, to-day, with $637,000 in treasure, and $7,800 worth of merchandise for those ports.

The rumor of the buying out of the old Merchant's Exchange was correct, and the sale was closed to-day. The rate of membership at the new Exchange will probably be raised.

Mining stocks at the San Francisco Board continue weak, nearly all descriptions showing a decline.

Adams, Blinn & Co. have resumed work with the men content to work ten hours. The Carpenter's League is using all means to induce the men to quit work. They offer them wages and *permit them to lay idle. No offer of violence has* been made.

Over 1,000 persons have signed a petition for an Independent Convention to nominate city officers.

Dispatch from Jackson.

JACKSON, CAL., Aug. 4.—The Union Republican Convention met here to-day and made their nominations as follows. For State Senator, M. W. Gordon; Assemblyman, F. C. Hall; Sheriff, C. Foster; District Attorney, F. G. Hunt; Clerk, B. F. Rytchmire, Treasurer, Frank McBride; Assessor, W. D. Getchell; School Superintendent, E. B. McIntyre, Public Administrator, W. T. Wildman; Coroner, H. B. Pelton.

Monetary.

Flour—$6 50@9 50.

Liverpool—wheat, 10s 8d.

San Francisco Produce Market.

Wheat—Receipts for the past twenty-four hours have been very large, amounting to about 4,000 sks, including heavy cargoes by two barges. The larger part of this quantity was purchased to the interior at prices equivalent to $1 70@1 75, delivered here.

Barley—Fair to new, $1 07½; choice, $1 12½ at the close 1,400 sks choice, $1 12½.

Oats—California, $1 45@1 65; Oregon, $1 60@1 70.

Shipping.

Sailed, Aug. 4th—Bark *Royal*, for Victoria and Port Townsend; bark *Burns*, for Barrard Inlet.

Vallejo Dinner.

VALLEJO, Aug. 4.—Admiral Farragut came in to-day from the Springs. The city flags floated as a welcome. An imposing cavalcade escorted him, with Mrs. Farragut, to the house of Gen. Frisbie, where he was received by the City Council and a committee of citizens, Reed R. Hubbs addressing him in their behalf. The speaker extended a welcome of the citizens of the valley, and spoke of recent services of the Admiral during the war, assuring him of the pride of the citizens of Vallejo in his achievements, as they considered him a pioneer of this city, and requesting him to make Vallejo his future home, &c. After the cheering subsided, the Admiral replied:

"Gentlemen, I did not anticipate a reception of this character, but confess I am not disappointed at this renewal of friendship, not tarnished I hope by my actions since I left you eleven years ago." After referring to the great changes of the city, he concluded by saying "I shall be happy, very much so, to spend with my family some short time among you, and get a good rest." At the close of his remarks an Admiral's salute was fired. The day closed with an illumination, torchlight procession and fireworks.

NEVADA.

VIRGINIA, Aug. 4.—Emerson Cans, who was shot last week by Hall, died to-day.

An exciting race took place between the Express companies to-night—Wells, Fargo & Co.'s with a buggy and Pacific with a pony, the latter barely ahead here, the former ahead at Gold Hill.

H. H. Flagg, I. Burnter, Wm. H. Elwell, A. M. Edgar and H. Hughes were elected trustees of Lady Bryan Mining Co.; George M. Hopkins, secretary, and James M. Wright, superintendent.

Albert Sprenger, whose skull was fractured, is thought cannot recover. His skull was trepanned to-day. Eleven pieces were taken from it.

The Virginia & Truckee Railroad Co. are

Philadelphia Ladies Admire the Cancan.

[From the Press.]

At Oakland the ladies and gentlemen passed 1 hour or two the other evening discussing ie cancan, as to its morality or immorality. he debate was lively and interesting. We ve a short synopsis from the letter of a cor- spondent:

Exactly what started the conversation in ie direction of the cancan I don't remember. 'erhaps it was the waltz which the three fid- lers were playing in the ball room, the faint ounds of which came drifting into the par- or. Perhaps it was the result of a desire on be part of a bold young New Yorker, who ad been to France, to say something he ought ot, and to astonish the ladies. If such was is nefarious purpose, he signally failed; for he ladies, who somewhere had seen Morlac- hi and Leah, and Baretta and Alexandrina— n fact I think all of those creatures that nade up what used to be so finely called 'the grand Parisian ballet troupe"—were not lisposed to let any man pass them in profes- ions of admiration.

"Why, they are delicious," said a lady from Cincinnati." I have never seen anything in my life so charming and so graceful as those three movements. And I didn't see any harm in them, either.

Then up spoke a lady from Philadelphia— "No, nor I, and I don't believe there is any. It is all talk;" and I believe the charming wo- man said that it was also "bosh." A lady from Washington said "Well, I went to see Morlacchi and Leah, and I looked just as care- fully as I could look to see something that was improper (shameless avowal,) and I didn't see one single thing. I think that the dance is as sweet and as pretty, and as darling a little fragment as any that nymphs of the woods were wont to dance in the days of an- cient Greece, or Pompeiian beauties in the luxurious days of the Roman Empire." It was quite evident that lady was from Wash- ington. She must have often listened to the divine Mullins.

The fair Cincinnatian came once more to the charge. "Now, I believe, I know enough to know when a dance is improper. To me the cancan is full of all grace and re- finement and bewitching charms. And I believe it is the fault of those horrid news- papers that have said so much about it. And the newspapers are no better than they ought to be." She shot a glimpse at me which made cold shivers run down my back, and myself to feel as if I was deserving of a hangman's knot.

The whole chorus of sweet voices rang in, in harmonious accent: "So do I!" "So do I!"

Very Singular.

DISCOVERY OF THE INFERNAL REGIONS IN SOUTH AMERICA.

The New York *Tribune* correspondence from Lima, May 28th, 1869, contains the fol- lowing:

In my last letter I mentioned the extraor- dinary [illegible] near Locumba, which ca[illegible]ed the death of all animals that approach the fatal spot. I am now enabled to give you some particulars. An American gentleman, who [illegible]t over the locality, confirms the previous reports. On the Locumba Road, about twenty-two leagues from Tacna, there exists what is here termed a dry *arroyo*, but in fact is the bed of a former river, into which, from [illegible] no water has been known to pass. During the late earthquake, which [illegible]ed Arica and partly Tacna, the shocks were [illegible]t in the neighborhood of Locumba and the Arpiel[illegible]

A mule driver [illegible]d that one of the mountains [illegible] split open, and a [illegible] of [illegible]ten was ejected out of the [illegible] the crater. No attention was [illegible]d to the [illegible] nor the mortality [illegible] the [illegible] which people began to leave Te[illegible] and flee from the scourge of the [illegible]ating the [illegible] to the [illegible] that they [illegible] aware of [illegible] upon [illegible]ality, at a distance [illegible] and ten miles from the [illegible]. The [illegible]t I can compare it to nothing else than old [illegible] water, of the smell of which you [illegible] painfully conscious.

"While twelve miles from its source my horse stopped down under me, and in five [illegible] he was [illegible]. He remained three or four [illegible] thick, black substance, similar in consistency and appearance to the black vomit. I was thus left to walk fifteen miles to the nearest hut, two-thirds of which I [illegible] a mules' graveyard, so thickly was the old road [illegible] with them. The cause of this singular [illegible] of nature is unknown; but it [illegible] that the gases which have impregnated the [illegible] have produce the vomit and death of the animals that inhale it. What the gases are [illegible] of course alone can solve. A [illegible] has [illegible]ed by the Govern[illegible] to go into this extraordinary matter and report upon it.

PAILROAD RATES AND RATES.—Re- [illegible]ing upon Senator Trumbull's speech in [illegible] in regard to this subject, the Chicago Tribune of July 17th says: Senator Trumbull struck the nail on the head when he told the officers of the Pacific Railroad that they had a great line of railroad with- out business, and that the rates must be re- duced until the road was loaded with travel. We took occasion at the opening of the road to show that at the rates heretofore charged, not even tea could be carried from San Fran- cisco to Chicago at a profit. Experience proves that it is a slow and up-hill undertak- ing to make the very long lines of railways pay [illegible] out of their earnings, and that they almost never do until, by the settlements along the road, a way traffic is built up, and the local freights make the dividends. The Pacific Railroad will have to reduce its rates very nearly as low as those which prevail on other lines in order to secure full trains at freight hours, and the key to railroad suc- cess lies in recognizing the fact that it costs nearly as much to run a few empty trains as it does to run them frequently and full.

TELEGRAPH ENTERPRISE.—Another great European telegraph project is on foot. A company just formed in London has pur- chased, with concessional rights, the follow- ing cables, namely: 1st, Denmark to England, from Sonderrig to Newbiggin, actual distance 334 miles; 2d, Denmark to Norway, from Hirtshals to Arendal, actual distance, 60 miles; 3d, Denmark to Russia, from Moen to Libau via Bornholm, actual distance, 304 miles; 4th, Norway to Scotland, from Egersund to Peterh[illegible] actual distance, 270 miles; 5th, Sweden to Ry[illegible] from Grisslehamn to Nystad, actual distance, 96 miles. Of these, the three first are already laid, and have been for some time working; the fourth is shipped on board ready for laying; and the arrangements for the fifth are in course of completion, and both the latter are to be laid at the risk and cost of the old companies. The new company undertakes the working, and will be entitled to the receipts from the 1st of June. The cost of purchase was $2,500,000. The ultimate in- tention of the company is a connection with North America via the Russian dominions.

AN ISLAND FOR RENT—TERMS MODERATE.—Anybody want a kingdom all for himself twice as big as the Isle of Wight, with hills as high as Skiddaw, timber, fresh-water streams, beautiful climate, varying only from 38 to 78 deg., and a soil that will grow anything? The *Telegraph* of recent date says, there is such a kingdom to let, to be had of the British Government for a moderate rent. It is the Island of Auckland, 180 miles south of New Zealand, with no natives, and belonging to the Colonial Office, which some years ago leased it to Messrs. Enderby, who leased it again to a company. The latter failed to pay the rent, and Government accordingly took possession again. No further assignment has been made, and if anybody wants to be a sort of King, and can get forty to fifty laborers to- gether, Lord Granville will, we doubt not, make him lessee, Governor and Parliament all together. He ought to be rich enough to keep a steam yacht though, or he will be rather more secluded than if he kept a pike. If ad- venture is not wholly dead among us, that is- land will be taken up this year.

TELEGRAPHING—SOME REMARKABLE EXPERI- MENTS.—Some remarkable experiments have been made in France on the relative rapidity with which messages pass through a telegraph- ic wire and impressions are conveyed through the nerves to the brain, and the result estab- lished is that the electric message travels with a swiftness many thousand times greater than the physical sensation, which is transmitted only at the rate of thirty metres in a second. Thus, supposing a whale thirty metres (about 103 feet) in length to be wounded in the tail, a second would elapse before the brain would be informed by the nerves of the event, and another second would expire before the will of the brain could be conveyed to the caudal muscles and action be taken to resent the in- jury, thus leaving an appreciable interval for the escape of the offender. This theory is strongly opposed by Claude Bernard and other eminent physiologists, who affirm that the limbs can take care of themselves without in- structions from the brain.

ROUGH ON THE DEMOCRATS.—A well known Democrat in this community, who was lately one among a party of grain thrashers in Sut- ter county, met with a terrible rebuke one day last week. He came to town after the day's work was over, secured an adequate quantity of Democratic whisky, and returned late at night to the camp of the thrashers. Whether from obliviousness or a love for Celestial com- panions, Democrat crawled into the rough bed of the Chinese. But in this act of choos- ing this bedfellows, Democrat disturbed the sweet repose of the ten or twelve Chinese, who immediately entered a loud protest against such familiarity. One or two of the Chinese awoke in an indignant frame of mind and proceeded to the head "Milisen" man who de- manded that the Democrat be removed; and it was found impossible to pacify the Cele- tials until the Democrat was "snaked out by his boots," and compelled to take other quar- ters. By this circumstance we infer that there is danger of the Mongolians excelling American Democrats.—*Marysville Appeal, July 21st.*

DENIED.—The *Washington Republican* de- nies that the daughters of Chief Justice Taney have been removed from their positions as clerks in the Patent Office. It says that when the clerical force was reorganized, cir- cular letters were sent to all lady employes inviting them to positions in the building, as provided by law, and asking their acceptance or declination, so as to enable the Commis- sioner to make the necessary arrangements. The above mentioned ladies declined the posi- tion, preferring not leave their homes to per- form clerical duty.

Arrivals and Departures of Mails in and from Portland.

PROCEEDINGS OF CLACKAMAS COUNTY COURT—August Term, 1869.—The viewers, A. F. Hedges, Jacob Wortman and Joseph Parrot, Sen., appointed at the July term of this court, made a report of the review of a road beginning in Oregon City and extending to or near the farms of J. R. Ralston and Wm. Holmes in Clackamas county, Oregon. There being no remonstrance nor any person objecting to the opening of said road, the same was ordered opened.

The citizens of Oswego petitioned the Court to appoint viewers to locate a county road, intersecting the road leading from Aurora, Marion county, to Oswego, and thence to the county lines of Clackamas and Multnomah counties. Jesse Bullock, C. W. Bryant and Josephus Tompkins were appointed viewers of said road.

The county road leading from Noland's mill on Butte creek to Oribble prairie, laid out in 1854, by D. P. Thompson, Surveyor, was this day ordered to be recorded, it having never been done at the time the same was opened; the statute since that time requiring all surveys and plats of roads to be recorded to make them legal.

Special orders was made ordering Eli Criswell of Harding's precinct, to open a road in his district which was laid out in 1866, in order that the same may be saved to the county, as the time for opening a new road runs out after four years.

Special order to the Treasurer of Clackamas county ordering the sale of legal tender notes for gold coin belonging to county funds.

Special order to Assessor to assess all the lands that have been bought by Clackamas county for delinquent taxes, and to give good description of same, so that if sold again, to perfect titles.

The Sheriff to-day filed his report of delinquent taxes and was allowed to retain the list for further collections on personal property.

The warrant for which county warrants were drawn on Treasurer, $327 45.

In the matter of the application of the "Oregon Central Railroad Company" of Salem, for the use of the county road from C[illegible] to Parrott's farm: This matter came before the Court upon the representation of Hon. Geo. K. Cole, agent of said Company, that it was desirable to have an order of this Court fixing the grade of such public road at points where the present traveled track is taken for the track or roadway of said Company. Thereupon the Court, by the the favor of said Company's agent, proceeded to make a personal inspection of said roads and the work which had been done. And by such examination it was found that neither the spirit or letter of the order heretofore made by this Court in granting the right of way to said Company is being complied with but that on the contrary said Company, in constructing said road way or bed, are confining the travel on the county road, at places between Canemah and Parrott's farm, to the river bank, and, in some instances, to the water's edge, by building perpendicular embankments of stone and leaving said embankments and the county road between them and the river, without any protection during high water; or if any protection is attempted, it is entirely inadequate for the purpose, and does not make that way as safe or convenient as before the Company [illegible] work.

Said Company is therefore referred to the order heretofore made by this Court, as above mentioned, as a basis or guide in controling their doings in reference to said road, and the condition in which the county road must be left after being by them in any manner interfered with in constructing said railroad. This Court re-adopts the same order as the basis of its action in making the following additional order, to-wit: That said Company, in confining the travel on said county road to the bank of the river, in narrower limits than the sixty feet allowed by law to public roads, creates a necessity for rock wall protection; and that when they desire to put in such walls at a greater angle than 45 degrees, they must build such stone walls of very large or heavy materials, and where the angle is 45 degrees or less the stone must be at least one foot in diameter; and in all cases the openings or interstices in such walls must be well filled with spalls or stone chips, in ordinary stone wall made in constructing their road beds.

It is further ordered that in any case where said Company changes the traveled way of the county road, or removes or change any bridge or filling on said county road, said new road way bridge or filling shall be graded as high, and made as good, convenient and secure in all respects as the traveled way before said road was interfered with.

And it is ordered that during the progress of said work, said Company must keep the traveled way on said road, open day and night, convenient for the use of the public; and when work is suspended for winter, said road must be left in good condition, and not unsafe and unsurvey, at the many places during the winter just passed.

In the matter of the suit of the county of Clackamas against the People's Transportation Company, for damages to the county road between Oregon City and Canemah.—On this day came the said People's Transportation Company, by C. F. Church its agent, and filed a petition in writing, confessing the error of the Company in some of its proceedings relation to said road, respecting that said Company had commenced to fill up said road where ordered, and to build a substantial stone wall for the protection of the same where it had been washed or was liable to be washed by the action of the water, and praying the court to remit the judgment obtained against said Company in the circuit court of Multnomah county, upon the Company's paying all the expenses to which the county had been subjected by reason of said suit; and therefore it was ordered by the court that when said Company shall have completed said wall and filling for the protection of said road as proposed by said Company to the Justice of this court, and shall have paid into the county treasury, in United States gold coin, all costs, fees and expenses, including attorney's fees, to which the county may have been subjected by reason of said suit, to be stated and ascertained by the Clerk of this court, and shall have transmitted that report to the Judge of this Court, then such filling, wall and payment shall be a satisfaction of such judgment, and the same shall be remitted and satisfied. And it shall be the duty of said Company to notify the court of the completion of such work, so that the same may be examined by the court or some competent person appointed by the court.

COURT OF SESSIONS UPON JUDGES.—Proceedings of yesterday.

EQUITY. Bybee vs John Little et al.; referred to J. W. Whalley, Esq., to take proofs and render decree on or before Aug. 20, 1869, at the special term of the Circuit Court.

[illegible] vs John Little et al.; referred to J. W. Whalley, Esq., to take proofs and render decree on or before Aug. 20, 1869, at special term of Circuit Court.

Mary [illegible] vs J. P. Garlick; decree of divorce for [illegible] and assumption of maiden name Mary I. [illegible].

[illegible] vs Multnomah County; Judgment on verdict of jury, for plaintiff for $75 and costs.

Court adjourned sine die.

FOR MRS. MILLER AND FAMILY.—Messrs. Bills, Failing and Mayer, the committee appointed to raise funds for the relief Mrs. Miller and family, went to work on this duty by invoking with a will, and in the greater part of the day, visiting all parts of the city. We are happy to learn that they met with very gratifying success everywhere, raising a sum of money which will provide the family, for the present, above want. Mercantile firms generally, on whom bills against Mr. Miller, deceased, were presented them, and many such contributed liberally to the fund. The result of the days' work shows that the committee was well chosen, and that the hearts and purses of our people are open to the calls of charity.

Captain William Patrick, Esq., of St. Louis, one of the leading lumber dealers in that section of country still erroneously called "the West," is a member of the party from that city who came to Portland on the last steamer from San Francisco. He and a portion of the party have been for several days on a visit to the Dalles and the surrounding country. They returned yesterday, and we acknowledge the courtesy of a call from Mr. Patrick. His views of our State are very much the same with those of other intelligent men who have recently visited us. He thinks we have great natural resources, but like California, we need some reform in the method of doing business.

PROGRESS OF THE U. S. BUILDINGS.—The work of digging the foundations for the United States Court house, Post Office, etc., has been begun. The method of doing it is unlike anything we have seen in this city. The holes are dug very methodically about two and a half feet deep and three to four feet wide. The stones are broken finely with [illegible] mers and laid down in the trenches in courses about eight inches deep, and then cement made thin enough to run rapidly among the interstices, is poured in. In this way, upon the hardening of the cement, the foundations will be as firm as if made of one solid rock, and as durable.

A PORTLANDER ON HIS TRAVELS.—Capt. Ainsworth, yesterday, showed us a letter from Mr. E. R. Thompson, who, with a part of his family have lately been traveling through various of the Eastern States. Mr. Thompson mentioned particularly a visit to the Mammoth Cave in Kentucky and several places made notable by the late war. He met with a number of people formerly well known in Portland, some of whom he represents as being desirous of returning here. The crops of grain and cotton promised finely. He intended at the date of writing, July 14th, to sail from New York for Europe, on the first of August.

THE HARVEST IN MARION COUNTY.—The *Unionist* is informed by Mr. D. Newsom, that the wheat in Marion county is now generally harvested. The weather has been very fine, and the new headers lately bought of Smith & Wade and Knapp & Burrell, have performed admirably and grain is well saved. The average yield of fall wheat is only twenty-four bushels per acre, this season. Early sown spring wheat yields about twenty-six bushels per acre. Oats do not yield well. Hay is nearly a failure, except on new swale lands.

CIRCULATING TAX DOCUMENTS.—During yesterday, Mr. C. P. Ferry, Secretary of the Immigration Aid Society and Labor Exchange, was engaged in preparing and mailing copies of subscription books, circular letters and copies of the Constitution, to the various parties named as committee men. We understand that a large number of the Constitutions will be distributed for information. The movement seems to be assuming such practical shape as to promise well for the future usefulness of the organization.

GOOD.—Multnomah Engine Co. No. 2, at their meeting held last evening, authorized their President, B. L. Norden, to subscribe on behalf of said company, the sum of $100 to the family of A. D. Miller, deceased, as a slight token of their appreciation of his services to the Company (although not a member) in years gone by.

SALEM MEDICAL COLLEGE.—Oregon is marching on after some of her older sister States. A young woman has been admitted to the course of medical students in the college at Salem, to reach the degree of M. D., and it is expected this concession to woman's rights may lead to the admission of other females to the same class.

TARGET EXCURSION.—The Annual Target and Pic-nic Excursion of the Emmet Guard will take place at Sauvie's Island on Thursday, August 19th. A glorious time is anticipated, and Capt. Caballin assures us that every effort will be put forth by the officers and members of the Company to render the occasion as pleasant as possible.

FROM SAN FRANCISCO.—The steamship *Orizaba* sailed at 10 A. M. yesterday from San Francisco for Portland.

BASE BALL—A MATCH GAME.—In answer to a challenge given by the Pioneers of this city to the Clackamas Club of Oregon City, a match has been agreed to, the game to be played on the Pioneers grounds at East Portland, at 10 A. M. to-morrow. Our boys have not played a full game together this year, unless they did last evening, but they intend to make it very lively for the Oregon City boys, to-morrow.

VELOCIPEDE SCHOOL AT OREGON CITY.—Mr. Lawrence the proprietor of the velocipede school at this city, has packed up his machines and will take them to Oregon City this morning, where he will open a school. He intends to introduce the mania for bicycle locomotion at various points in the interior.

WORK COMMITTEE.—Messrs. Anthony Iverson and Caldwell, the Immigration Aid Committee for the First Ward in this city, will call upon the people of that ward during to-day and to-morrow, when all those who mean what they say, are expected to contribute.

ACKNOWLEDGEMENTS.—Mrs. Miller desires to express her heartfelt thanks to her neighbors and the people of Portland, who so generously assisted her and gave her their sympathies through the terrible affliction of her husband's death and burial.

FROM ASTORIA.—A gentleman from Astoria informs us that Mrs. Montgomery has been attacked by small pox. This was expected, as she was constantly with her husband through his illness. No fears are entertained, however, that the contagion will spread.

U. S. CIRCUIT COURT—DEADY, J.—Stark vs Starr, action to recover lots 1, 2 and north half of 4 in block 81, on the levee. The day was consumed in hearing the testimony in this case, by the court without a jury.

AT THE SPRINGS.—Gov. Woods and a considerable number of Salem people are reported at Wilhoit's Soda Springs, in Clackamas county. The popularity of this place of resort seems to be growing rapidly.

U. S. DISTRICT COURT. DEADY, J.—Grand Jury came into court and returned one indictment and ignored "a true bill," for issuing an instrument without stamping the same.

WRIGHT FOR PUGET SOUND.—The steamer *Wright* took away last evening, for Puget Sound, one hundred and seventy-five tons produce and merchandize.

LECTURE.—Major Adams, of the Vancouver *Register*, is announced to lecture this evening at East Portland, upon the "true progress of the time."

SENT TO JAIL.—Justice Bull, yesterday, sent Richard Graham and Wm. Davis to jail, each for two days, upon charge of assault and battery.

FOR PUGET SOUND.—The steamer *Geo. S. Wright* sailed last evening for Puget Sound and Victoria, with a full freight.

REMOVAL.—DR. GLISAN having removed his office to the corner of Front and Washington streets can be found there from 9 A. M. until 2 P. M.

A WATER SPOUT AND WHAT IT DID.—A Nashville paper tells this story of a water-spout which formed in the Cumberland river at that place during a severe thunder storm recently. A whirl wind or miniature cyclone formed just below the suspension bridge, and continued its course with the bend of the river above the water-works. So powerful was the whirl and so great the suction force developed, that a regular water spout six or seven feet in height was formed and was swept along the river by the wind.

Just above the upper landing there is a small bathing boat, which is fitted up with evergreens as a screen to the bathers as they perform their toilets. At the time when the storm came up a party of about a dozen boys and men were bathing in the river, and had their cloths hung on the evergreens which formed the side of the boat next to Broad street. Along came the water-spout in its course, whisked the trees from the side, clothes and all, and sent the whole far up into the sky.

Away went the raiment of the bathers before their astonished eyes, the spirits of the air crawling in and out of the different articles, and trying all sorts of ways to feel comfortable and at home in them, but without success. Away went the clothes sailing through the air, and followed by the anxious gaze of the bathers, until having risen to a considerable elevation in the region of the water works, they disappeared from view. The party swam, some to the boat, which had been drenched and partially filled with water, and the others to the shore. *All called loudly for* clothes, and each was eager to secure the services of some one to go for a change of attire. A number of articles of apparel were finally secured, and then there was great swapping among the crowd to get fitted out. The whole crew finally succeeded in getting sufficient covering to evade the law, and then started home. The whole affair partook considerably of the ridiculous, and caused much merriment among those who witnessed *this freak of the wind.*

This is the first water-spout that has been witnessed in this section of the country, and the rarity of the phenomenon renders it worthy of more than passing notice. The regularity of its movements in following the course of the river is certainly singular. The suction force or lifting power manifested was very considerable, as we have seen.

CARRIED AWAY BY A KITE.—A young lad at Lake Station, Miss., had a large kite presented to him, about six feet by four in size, which he attempted to fly the other day just as the wind was increasing and a storm was threatening. The wind drew the kite so heavily as to drag the boy along also. To prevent losing his favorite, he wound the cord around his body. At last the wind bore the kite and boy upward, until the young kite-flyer caught in the top of a tree, and was suspended seventy-five feet above ground. A flood of rain came, slackening the line, abating the wind, and allowing the little sufferer to be rescued. He was found to be unconscious, and so bruised and marred as to be scarcely recognised, but was restored the same evening and is now doing well.

GOODS CHEAPER.—Robbins and Kleth, members of the "Chicago party," to whom frequent allusion has been made, called upon us last evening. Robbins is President of the Chicago Board of Trade, and Keith is of the well known firm of Keith, Brothers of that city. They have come among us to talk business, and our dealers will be happy to meet them. They express the opinion that goods of almost every description can be purchased cheaper in Chicago for greenbacks than in San Francisco for coin—which we do not doubt—and we hope direct business relations may be established with that market.—*Virginia Enterprise, July 30th.*

The fishing at Au-sau-qua-quot-au-son-go mogo ton go lake, in Oxford county, Maine, is reported as first rate.

BREAKING THE PLEDGE.—Whenever teetotalers talk about drunkenness, they invariably indulge in a bitter rail.

Attention, Washington Guard!—Regular Monthly Meeting this evening at 7½ o'clock. A punctual attendance of the members is requested.

By order of the Captain.
S. V. FULLER, O. S.

Benj. Todd will lecture in Oro Fino Hall next Saturday and Sunday evenings, commencing at 8 o'clock. Subject Saturday evening: "Religion; what is it? Is it of God or man?" Sunday evening: "Sunday just as good as any other day." Admission 25 cents.

NOTICE.

WE TAKE PLEASURE IN CALLING the attention of dealers to a [illegible] Patented Improvement in Electro Plating, now in general use throughout the United States, and pronounced by all who have used it to be the most perfect and reliable process for plating [illegible] ever introduced.

EXTRA COAT OF SILVER!

THREE TIMES THE USUAL THICKNESS.

We call the attention of the trade to our [illegible] which [illegible] the ordinary process of plating. The great advantage will be readily seen, as spoons and forks always wear through on the [illegible] points, while the plate is yet good on other parts of the article. This new process will add THREE TIMES TO THE DURABILITY of goods so plated.

Knives, forks and spoons stamped "1847 ROGERS BROTHERS A1 XII," are Electro Plated by the new Patented Process.

We have now been before the public since 1847, manufacturing ELECTRO-PLATED GOODS, which have stood the most severe tests of wear in hotels, steamers and private families, and have given universal satisfaction, supplying, as it does, all of the advantages of silver in durability and beauty. We wish to call particular attention to the hardness and firmness of our White Metal, which exceeds anything of the kind made in this country. All goods plated on this metal bear our trade mark, and the plating is warranted THREE TIMES THE USUAL THICKNESS.

WHITE'S NEW MAP
OF
WASHINGTON TERRITORY!
WEST OF THE CASCADES.

OLYMPIA, W. T., May 24, 1869

THE UNDERSIGNED WOULD RESPECTFULLY solicit subscriptions to enable them to publish a MAP OF WASHINGTON TERRITORY West of the Cascades, compiled from the United States Surveys and the best and latest authorities. The scale is four miles to an inch, making the map sixty seven by fifty one inches. In addition to the topography of the country, the map shows the extent of the Surveys, the Indian, and Government Reserves, the Prairie lands, the soundings of the principal harbors, and many other particulars not given in previous maps. THE SUBSCRIPTION PRICE IS TEN DOLLARS; RETAIL PRICE, TWELVE DOLLARS. The map will be furnished, colored, mounted and complete, by August. It was forwarded in March to the establishment of Colton & Co., New York, for publication.

Subscriptions may be forwarded to Joseph Cushman, Receiver Land Office, Olympia; W. C. Painter, Walla Walla; A. G. Cook, Vancouver; S. J. McCormick, Portland, who will receipt.

We call attention to the following endorsements.

HAZARD STEVENS,
CHAS. A. WHITE.

ENDORSEMENTS.

OLYMPIA, W. T., March 27, 1869.

C. A. WHITE, Esq.—*Dear Sir.* Having examined your original map, embracing that portion of Washington Territory west of the Cascade Range, I desire to add my testimony to its value. Having been engaged for a number of years in the surveys from Cape Flattery to the Head of Puget Sound, I have examined this portion of your map more critically than others, and I take pleasure in vouching for its general correctness.

This map will fill a want that has long been felt, not only among the residents of this Territory, but others, who are desirous of obtaining information of this portion of the "Far West," and I trust that we shall soon see it in a form suitable for general distribution.

JAS. S. LAWSON,
Asst. U. S. C. S.

We endorse the annexed opinion of Jas. S. Lawson, Esq., and will add that Mr. Chas. A. White is a practical surveyor, and has had access to the township maps in the two Land Offices in this Territory, as also the Coast survey charts; and we can vouch for his map of Washington Territory, west of the Cascade Range of Mountains, as being correct, and the only good map of the same territory that has been made.

NATIONAL
LIFE INSURANCE COMPANY,
OF THE
UNITED STATES OF AMERICA,
Washington, D.C.

CHARTERED BY SPECIAL ACT OF CONGRESS!

APPROVED JULY 25, 1868.

CASH CAPITAL,
$1,000,000.

OFFICERS.

CLARENCE H. CLARK, Philadelphia, President.
JAY COOKE, Chairman Finance & Executive Committee.
HENRY D. COOKE, Washington, Vice President.
EMERSON W. PEET, Philadelphia, Secretary & Actuary.
R. S. TURNER, Washington, Assistant Secretary.
FRANCIS G. SMITH, M. D., Medical Director.
J. EWING MEARS, M. D., Assistant Medical Director.

THE ATTENTION OF PERSONS CONTEMPLATing Insuring their lives, or increasing the amount of insurance they already have, is called to the special advantages offered by the NATIONAL LIFE INSURANCE COMPANY.

NO MONEY SENT OUT OF THE STATE.

ALL PREMIUMS RECEIVED INVESTED IN THE STATE.

THE ADVANTAGES OFFERED ARE:

It is a National Company, chartered by special Act of Congress, 1868.
It has a Paid-up Capital of $1,000,000.
It offers Low Rates of Premium.
It furnishes Larger Insurance than other Companies, for the same money.
It is Definite and Certain in its Terms.
It is a Home Company in every locality.
Its Policies are Exempt from Attachment.
There are no Unnecessary Restrictions in the Policies.
Every Policy is Non-forfeitable.
Policies may be taken which Pay to the Insured their Full Amount and Return all the Premiums, so that the Insurance costs Only the Interest on the Annual Payments.
Policies may be taken that will Pay to the Insured, after a certain number of years, During Life, an Annual Income of One-Tenth the amount named in the Policy.
No Extra Rate is charged for Risks upon the Lives of Females.
Insures Not to Pay Dividends, but at so low a cost that dividends will be impossible.

Its Policies are Negotiable.

By the Charter of the Company, certificates of obligations will be issued, agreeing to purchase its Policies at their value which, when accompanied by the Policy duly assigned or transferred, are negotiable, and may be used as collateral security, in making loans from the Company or from other parties.

The Hon. Jno. F. Sandford, Insurance Commissioner of Massachusetts, in his Report for 1868, speaking of Dividends in Life Insurance Companies, says: "The sooner such guarantees cease to be made, and such expectations created, the sooner Life Insurance will come to rest on its true motive, and men insure their lives for security, and not for dividends. The best and most popular companies will then be those that promise only equity, and render all that they promise, and furnish the best security, with the most upright and judicious management."

"By the Stock plan, the full cash effect of the Premium is immediately secured to the Insured, the Company taking ALL the risk. By the Mutual plan, the full value in Insurance of the Premium paid, is not secured to the policy-holder, who takes a portion of the risk himself."

FRIDAY MORNING, AUGUST 6 1869

The United States Treasury.

The business of the Treasury Department is to collect, hold and disburse the moneys required to carry on the Government. The specie is received for imports, which are much larger at some seasons of the year than others. The currency receipts from the internal revenue are largest in the months of May and June. The principal specie payments are for interest in January, May, July and November, while the largest disbursements of currency made at any one time are for pensions, which fall due in March and September.

Statements are often made relative to the influence of the Treasury on the money market. A little consideration will show what it is The total amount of accrued interest, July 1st, was $48,000,000; specie on hand, $79,000,000; an excess of $31,000,000, or less than three months' interest on the public debt; while the gold deposits in the Treasury belonging to private parties were $30,000,000. Depositors by combining would have greater control over the gold market than the Secretary of the Treasury. Secretary McCulloch several times tried to reduce the price of gold by making large sales, invariably with the same results. While the Government sales continued, the brokers sold, but as soon as they ceased, the brokers advanced the price without fear of competition from the Government. But Secretary Boutwell has reformed that by selling gold in stated amounts at stated times, thus giving steadiness to financial operations and making it less easy for the money jobbers to run the price of gold up or down to suit their own speculative purposes. They tried to frighten the Secretary from this policy by combining to keep up the price of gold, but he beat them at that game and they were compelled to give up the contest. McCulloch had not the pluck that Boutwell possesses, and he therefore yielded in a contest which his successor has fought through triumphantly. The former Secretary made purchases and sales before disclosing them to the public. His movements were therefore watched with great anxiety, being known, of course to a few brokers before the public were aware of them. Such a policy produced great uncertainty in financial operations. The present Secretary pursues a totally different method. He has no secrets and makes no secret operations. When he decides to sell gold he goes into open market, and sells it on the most advantageous terms which free competition can give him. After the close of business each day a tabular statement is made showing the result of the day's operations in each department of the Treasury, so that a full statement of the public debt could be made each day if desired.

A Speech Revised.

Senator Casserly of California is much like that countryman of his who was described as "never opening his mouth but he put his foot in it." Casserly's particular weakness is a lack of fear of the truth. A few weeks ago he made a speech in San Francisco in which he was reported as saying that "the Chinese are the most frugal, industrious and ingenious people on the face of the earth." This remark attracted particular attention in the East and South. Men engaged in industrial operations at once declared that this was the very class of laborers they wanted. At once a perfect furor arose for Chinese immigration. All the leading Democratic journals spoke up in favor of bringing over laborers by the million from that hive of industry beyond the Pacific. Senator Casserly saw the necessity of making an explanation. He therefore set to work to throw on the reporters the charge of misquoting him. Accordingly last week he advertised he would speak for another speech in San Francisco to clear up the errors of the first. And that he did not be misquoted on his vital point he furnished each of the papers with a written version of this portion of his speech. Here is the letter in which he corrects former statements:

I am charged with having said then that "the Chinese are the most frugal, industrious and ingenious people on the face of the earth." I uttered no such fulsome eulogy of the Chinaman—no such libel on the working men of America and Europe. I spoke of the Chinese as "competitors not to be despised even by our skilled mechanics, for the reason that as a race, they are industrious and frugal, and ingenious in many handicrafts."

This is a confession with a vengeance! Its tendency will hardly be to stop the Democratic fanfare at the South for Chinese labor. Even the Democratic press of San Francisco make sport of the Senator. The *Herald* introduces this portion of his speech thus:

The following was handed to our reporter on Wednesday night, as the authorized version of what Casserly wanted to be understood as saying that evening. The word "applause," interpolated twice, was not interpolated by our reporter. The printed slip was handed to him with the applause interpolated in pencil. Our reporter is particular about this, as he wishes his reports to be accurate, and as there was, in point of fact, no applause at the time "applause" is marked.

It is greatly to be hoped that the Senator's "explanation" will have the effect to set him and his party right on the Chinese question!

In General.

Duluth, the terminal city on Lake Superior, gets its name from Daniel Greysolon Duluth, a French explorer who built the first trading post on the Lake in 1679.

During the five months of Gen. Grant's term which have now expired, the national debt has been reduced forty-three millions of dollars. During the last year of Johnson's term it was increased. This comparison shows the advantage of having honesty and capability in the management of national affairs.

We now receive mail advices from New York by way of Idaho from three to four days sooner than by way of San Francisco. For instance, last evening we received the *Times* and other New York journals of July 25th, while the San Francisco *Bulletin* received last night contained mail advices from New York to July 22d.

The Chicago *Advance* says: "Within eight months of the present time ground will undoubtedly be broken for the construction of the Northern Pacific railroad, which is to they once get fairly under way they will do it. The Oregonians should be able to come into the market here and break up the importers' ring."

The basis of operations laid down by the Board of Statistics and Immigration in the Constitution which has been published is a broad one, and if the programme is carried out as therein indicated, important results must follow. To carry out a plan so comprehensive unity of purpose and of action throughout the State is indispensable. Now that the movement is started, let our people co-operate to push it forward with all possible vigor.

General News Items

In New York, recently, Mr. A. P. Meissenger accomplished the extraordinary feat of riding five hundred miles on a velocipede inside of fifty consecutive hours.

Henry J. Raymond died worth $450,000, a little over $250,000 of which was in real estate, and the balance in personal property. His widow has been granted letters of administration.

A man in Adair county, Iowa, has invented a cannon, which he claims will throw a projectile fourteen miles, and has gone to Washington to get a patent. He proposes to offer it to the Government for $1,000,000.

Mrs. Mary Rousseau Watkins, daughter of the late General Lovell H. Rousseau, U. S. A., and widow of the late Gen H. L. Watkins, died on the 8th ult., at St. Paul, Minn., whither she had gone for her health, which had been most delicate for several years.

A French writer, just returned from Italy, gives the following dismal picture of the actual condition of Garibaldi: "The General is reduced to a skeleton; his features are wizened and contracted. I found him lying on a divan and suffering horribly from chronic rheumatism. The ex-dictator, bent over like the leaning tower of Pisa, is but a shadow of his former self. It is difficult to recognize the lion of the republic in this forlorn and babbling old man."

A Washington dispatch of July 22d, says The various trade organizations of this city held a meeting last night, and the president of the meeting wanted to bring up the Chinese question. One of the leading members said he thought that it would be time to take action when the Chinese stormed the city, and he would do all in his power to get them into the trade unions. The advocates of these organizations should not oppose them in their race for life, but should if possible get them into the trade unions. With these remarks the subject was dropped.

It is rumored that in Philadelphia will be celebrated the one hundredth anniversary of American Independence. The festival is still seven years distant, but Philadelphia is a slow city and means to have a magnificent affair, and so perhaps the time allowed for preparation is none too much. This is all very well in the abstract, and we do devoutly trust that the 4th of July, 1876, will be celebrated with all per the Century, in every part of the United States. It is proper, too, that Philadelphia, which witnessed the birth of the American nation, should also be the central point of the festivities which are to illustrate its centennial anniversary.

The West.

Lieutenant Davidson has arrived and relieved Special Indian Agent Powell at the Fort Hall reservation.

An Owyhee paper says: Judge Watson thinks he has struck the mother of the whole family and system of ledges on War Eagle Mountain. He calls his discovery the Emerald, and avows a belief that it is the main stem from whence the Trout & Jennings originally slid.

The centennial anniversary of founding the Mission of San Diego—the first in Alta California—which was dedicated to divine service on the 16th of July, 1769, by Father Junipero Serra, was celebrated on Sunday, 18th of July, 1869, by laying the corner-stone of the New Mission church at San Diego.

Says the Owyhee *Tidal Wave*: We are assured by those whose business takes them over the mountain that there is more work now being done on outside mines, that is to say, mines that are not usually counted as producers, than ever before since the discovery of the camp. This work, as a general proposition, is in the character of prospecting, or rather development where ledges have been struck but not proven sufficiently.

The "World's" Opinions.

To the thinking and live Democrats we recommend the following from the New York *World*. The *World* shows some timidity, speaks carefully, but it talks as if it had brains. The following is what it says:

When there is no longer any hope of the adoption of some particular opinion by a majority, from that time forward, that opinion is taken out of the domain of politics proper, and belongs to the province of dogma. The defeated opinion may thereafter continue to be regarded by the minority as true, but it can no longer be regarded as practical. When a party to a law suit is beaten in a court of last resort, his persuasion may be as strong as ever of the justice of his cause, but he sees the futility of further attempts at litigation. When an objectionable bill has passed a legislative body, its opponents cease to make any more speeches against it. Their opinions may be unchanged; but they think it better to devote their energy to procuring sound legislation on the subject. It concerns the public interest that important questions shall at length be settled, one way or the other; and, when they have been irreversibly decided, the overruled opinion, though not abandoned, becomes a mere dogma, and is excluded from the domain of politics. If politics, like religion, aimed at nothing beyond the mere enjoyment of a creed, the rejection of that creed by a majority should have no more effect than its rejection by a minority.

The opposition to negro voting is judicious and rational, so long as there is any chance of shutting out the negroes from the suffrage; but, when all such chances have finally vanished, no good purpose is served by keeping up the agitation This is the view on which the Democrats of Virginia acted, in the late election, with reference to negro suffrage in that State: it is the view on which the Tennessee Democrats are acting; it is likewise the view on which the Democrats of Texas and Mississippi are likely to act if the approaching elections in those States. As a mere matter of dogma, their opinion on the subject is unchanged; but matters of mere dogma are outside the realm of practical politics. The Southern Democrats would prevent negro suffrage if they could; but, seeing that its prevention is impossible, they recognize the facts of the situation, and turn their attention to objects they have some hope of accomplishing.

The Elder Booth as Hamlet.—From the *Atlantic Monthly* we get the following:

In spite of the former triumphs of Cooper, Cooke and Kean, Booth almost immediately became the favorite of the (American) public. Richard III. was his most famous part. But those who saw his Hamlet, before any decay dimmed his greatness, cannot even at this lapse of time speak of it with the calmness of criticism. It was *par excellence* the Hamlet of Shakespeare. In it Booth's wonderful pathos, his fiery bursts of passion, his soliloquies, where each word seemed to drop from his heart rather than from his lips, his veneration for his father's spirit, his impassioned pleading with his mother, and his manner in the last scene, where the destiny which has led and thwarted all his purposes overwhelms him with its deepest melancholy and foreboding, are all familiar to us in description. And every look spoke with such full meaning of all that was passing in the mind of the character, that the audience seemed to be reading the thoughts of Hamlet himself.

An Iowa paper says: "To illustrate how towns spring up in Iowa, we give an example. Last Fourth of July the town of Dexter, near the State capital, did not exist. Not a house could be found on the spot to be named 'city.' Even the cross roads blacksmith shop was not there. This year the editor of the *New Era* was sent to Dexter to attend a Fourth of July celebration. He found about one hundred and fifty houses there, many of them substantial buildings, with stores that had already sold goods to the amount of two hundred thousand dollars. What is more, just outside of the village, double the amount of in-

Virginia

The President's Forbearance toward the State—Its Help to Him in the Past.

From the Richmond Whig, July 20.

The next sunshine that touched Virginia came through President Grant, and what wonderful results it developed. They form an instructive study for the statesman. Congress had been harsh, and we had become suspicious, hopeless, almost despairing. The new President evinced a kindly interest in our affairs and suggested the first measure of relief from proscription in his memorable special message to Congress. That message seemed to arouse a liberal spirit in Congress, and the result was the submission of the Constitution to the popular vote in such a form as to enable us to vote down the test oath and the disfranchisement.

This liberal action had an almost magical effect upon the people of Virginia. It awakened hope, and with it a set of feelings and sentiments that we had not before had the opportunity of indulging. Our hearts, that had been rendered hard by severe treatment, now expanded like flowers after a genial shower. We were all aglow with generous and grateful feelings, and ready to do anything and everything in the interests of peace and good will.

Such was the effect produced by the manifestations of kindness exhibited by the President, that even before his official action was taken, and in full faith and confidence that his pledges to our friends would be observed, we convened what was known as our State Conservative organization, and withdrew the State ticket nominated the preceding year.

After his official action was taken, and which, in consequence of being modified by his Cabinet, in the matter of the county organization, did not come fully up to our expectation, we proceeded to open our canvass. Instead of running a ticket of our own, composed of ex-Confederates and Conservatives, the people all through the State, with an unexampled unanimity, adopted the ticket nominated by the "True Republicans." This ticket was composed of anti-proscriptive Grant Republicans. The gentleman leading the ticket was not only a Republican, but a Northern settler. After an active canvass the elections were held. We elected the "True Republican" ticket, we ratified the expurgated constitution by an overwhelming popular vote, and triumphantly carried out the Congressional and Presidential policy of reconstruction in all its parts. One condition cannot be complied with, i. e., the adoption of the Fifteenth Amendment, until the Legislature is convened, but we are all eager for its meeting in order that it may be complied with at once. More than this, the Legislature will avail itself of the first opportunity to elect two Republican Administration Senators and to pass all such laws as are necessary and proper to give full effect to the principles embodied in the Constitution.

The Legislature we have elected is composed of gentlemen who are without exception eligible under the Constitution, adopted, and are animated by a sincere desire to bury the dead past; to comply with all the requirements of Congress and the President in their letter and spirit; to restore good feeling between all classes of our population, and to protect all citizens, of whatever race or nativity, in their rights, franchises and privileges, and in their persons and property.

Such have been the results of our recent election. But we have done more than all this. The people of Virginia, starting upon President Grant's line of peace, have suppressed all old and cherished prejudices, dogmas and theories. They have thrown down all the political barriers between the two races, and have preferred men of Northern birth over native Virginians for official position.

They have done all these things in good faith and in the interests of reconstruction and peace. They have done them from the sincere desire to meet the wishes of Congress and the President, and have done them fully, thoroughly, cheerfully, in order that there may be no pretext for withholding from their work the sanction of the Government.

The line of conduct they have pursued was taken upon the understanding, we may go further and say, the assurance, that they would receive the sympathy, the assistance and the sanction of the President. Upon this they have relied and now rely. They feel that all their pledges, express and implied, have been fully redeemed, and that all their duties as good loyal citizens have been faithfully discharged. Aware that bad men, hungry for office and boiling over with hatred, are intriguing to cheat them out of the fruits of their victory, they look trustingly to President Grant to see that justice is done them, that faith is kept, and that the good work done by them shall be consummated at Washington. Encouraged by him in the beginning, they feel entitled to claim his assistance, influence, protection and sanction in the consummation.

We have kept faith with the President, and now commit our work to him in full confidence that he will keep faith with us.

A Menagerie in a Midnight Storm.—The Davenport (Iowa) *Gazette* of July 14th relates the following:

On Monday, Bailey & Co.'s Menagerie and Circus exhibited at Muscatine. The tent was struck at 11 P. M., and the show started for Davenport. Before a dozen miles had been traversed a terrific storm let loose its lightning, thunder and water. The lightning was blinding in its brilliancy, the thunder was terrific, and the rain, violently driven by the wind, came down in sheets. A panic seized the whole cavalcade—men, horses and animals seemed terror-stricken. Eight of the drivers deserted their teams, and it was not long before horses and wagons were in inextricable confusion—a jammed up mass of floundering animals and overturned vehicles. The darkness, save when lightning illuminated the scene, was impenetrable. The caged lions, tigers, leopards, wolves and other beasts became frightened, and bounded from side to side of their prisons, and roared and growled, and shrieked in very terror. The lightning came nearer and nearer, until its thunder seemed to break in the midst of the caravan. The elephants laid down in the road and refused to move. Three horses were struck by lightning and killed. It is a wonder that no human lives were lost. At daybreak the scene presented beggars description. Imagine it from the above account of the night's experience. It was the worst adventure that ever befell a circus in this portion of the West. The show reached Davenport at a late hour in the day, men and teams well nigh exhausted by the terrible night's work and the hard journey which followed it.

A curious fact has lately been brought to notice in regard to the Nevada silver mines. Heat, not water, is the chief enemy encountered after reaching a great depth, and instead of pumping out water the company have to pump in air. A Nevada paper says:

The increase of the heat in our mines is now beginning to give many of our mining companies more trouble, and is proving a greater obstacle to mining operations in those levels lying below a depth of one thousand feet than any veins or "pockets" deposits of water yet encountered. A number of the leading companies on the Comstock are now engaged in putting in engines to be used expressly for driving fans for furnishing air to lower levels, forcing it through tubes of galvanized iron. With this great increase of heat in the mine, comes a great decrease of water; in fact, in our deepest mine, the Bullion, which has attained the depth of twelve hundred feet not a drop of water is to be seen, it is as dry as a lime kiln and as hot as an oven. In the lower workings of the Chollar Potosi mines, which have a perpendicular depth of eleven hundred feet beneath the surface, the thermometer stands at one hundred degrees—a frightful heat to be endured by a human being engaged in a kind of labor calling for severe muscular exertion. Here, also, we find the water to have decreased till there is at the present time a very insignificant amount.

St. Paul and Pacific Railroad to be Completed to Red River this Year.

From the St. Paul Pioneer, July 14.

Last Saturday General George L. Becker, President of the St. Paul and Pacific Railway Company, received a cable telegraphic dispatch from Litchfield, of London, who represents the English capitalists interested in the construction of the road, asking if it would be possible for the contractors to finish the track through to Red River the present year.

President Becker, after conference with the contractors was enabled to reply that the road could be completed that distance within the time named. Yesterday he received a further dispatch from London directing the completion of the road to Breckinridge, the point where it will touch Red River.

A contemplation of the amount of labor involved in this enterprise will show its wonderful extent. The line of the road from here to Breckinridge is 214 miles long. At the opening of spring, the present year, forty miles of this, the main line, were completed. Thirty five miles of additional track have been laid, and to-day trains will run through to the edge of the prairie, seventy five miles from St. Paul. One hundred and seventy five miles more were, previous to the late order, under contract to be completed the present year, which would leave the road within sixty miles of Breckinridge. But this section is now to be pushed within that time, making 174 miles of road built and to be built in 1870. Aside from the Pacific Railroad, this amount of track, resulting in one year's operations, is almost without a parallel.

Last year the sum of $3,000,000 was expended in the construction and equipment of this railroad. The labor of construction and the cost of equipment this year, will involve an expenditure of $5,000,000 more. These facts are more eloquent than other language applicable to the subject. They are the record of a degree of enterprise and daring in railroad construction that are unsurpassed.

This road will be built through one of the finest sections of country in even the fruitful Northwest. The vast prairies, the noble groves, the lake shores and river banks through this broad stretch of longitude, have heretofore been almost inaccessible, as the big Woods were almost impassable for the throng of emigration that surged against their green walls. But with the opening of this railroad line an avenue is provided along which thousands of people are crowding to the valleys beyond. Grains of all kinds grow in abundance upon this rich soil, it is well adapted to grazing, the more hardy fruits ripen easily; potatoes and other esculents yield in great abundance. It is an inviting field to settlers who propose to engage in farming, and the numbers who are crowding thither will create the necessity for mechanics, for stores, for mills, and all the branches of industry that flourish in agricultural communities.

The effect of this enterprise on St. Paul will be to give its trade and growth a new impulse; while the expenditure of this amount of money renders the times easier, and adds to the general prosperity.

The connection of the St. Paul and Pacific with the Northern Pacific Railway must always be very intimate. Undoubtedly the latter named company will find it to their interest to commence the construction of their line from the Red river westward, and that the traffic and travel of this route will, for a number of years at least, find its way over the route that is being so energetically built northwestwardly from St. Paul.

Another Ocean Mystery.—The steamship *United Kingdom*, as most of our readers are now aware, sailed from the port of New York for Glasgow, on the 8th of April last. She had a fair cargo on board, and a goodly number of passengers. On the 20th, the day after the sandy she was spoken some one hundred fifty miles from Sandy Hook. It is supposed by some that she was seen May 4th, about five hundred miles from New York. This is all that we know of the *United Kingdom* since she last left her Harbor in these waters. It is now a long time since April 19th. April is gone, May and June have followed, and now we have entered upon July; but the fate of the *United Kingdom* is still unknown. That she has perished with all on board it is now reasonable to conclude; but from what cause, or to what circumstances, we are left to conjecture. On the 26th of April, six days after the *United Kingdom* sailed, the *City of Paris* arrived in this port and reported icebergs and heavy gales in the neighborhood of Cape Race. It is possible that the *United Kingdom* perished amid these gales, and probably from collision with an iceberg. It is hard to give up hope, but we are not left any foundation on which longer to lean. Like the *Hibernia*, of painful memory, the *United Kingdom* has no doubt gone down; but, unlike the *Hibernia*, has, in all probability, carried with her her entire living freight. It is in fact another terrible sea tragedy—all the more terrible, in truth, that no one has survived to tell the tale.—*Scottish-American Journal*.

At Lawrence, Massachusetts, a cunning old farmer was recently tried for putting stones in his loads of hay to increase the weight. He put 115 pounds of stone in one load, and was detected pulling them out after the hay was weighed. One witness testified that he had been annoyed for a year or two past at times, by piles of country stones, mowed, being left where the prisoner unloaded his hay.

WM. R. SEWALL and J. B. SPRENGER

Take this method of notifying their friends, the traveling public, that they have disposed of their interest in the Western Hotel, and hereafter will continue to manage the COSMOPOLITAN, which in the future as in the past, will always maintain its reputation as the BEST and only FIRST CLASS Hotel in the city.
